Elios — G4

Inner structure
100% BIOPS PES Filling

High density pressed polystyrene covered with hight quality dryfeel foam rubber. This structrure materials ensure the durability of the product and maintains its shape over time. It avoids deformation.

Specific cleaning needs

Lola G can be unholstered for its washing, however, given its difficulty, we recommend avoiding this process if it is not an extreme case.

Remove excess dirt with absorbent paper, apply cleaning product on the stain and leave for a few minutes. Remove residue with a clean cloth, you can use water with a little pressure (do not use a Kärcher).

The water-repellent interior is drainable, does not absorb water. Leave to dry.
