Filling options

Compact foam rubber, 25 kg density. DRYFEEL.

Compact foam that guarantees durability and resistance, maintaining its shape over time. For indoor spaces and covered terraces.

Specific cleaning needs

Duna Collection can be unholstered for its washing, however, given its difficulty, we recommend avoiding this process if it is not an extreme case.

Remove excess dirt with absorbent paper, apply cleaning product on the stain and leave for a few minutes. Remove residue with a clean cloth, you can use water with a little pressure (do not use a Kärcher).

The water-repellent interior does not absorb water. Leave to dry.
