

Care and maintenance

Agora 3D fabric

The fabrics are designed with the intention to be strong, durable and resistant. The water resistant finishing further improves the performance characteristics so that the fabrics are stain repellent, easy to clean and require a minimal but constant maintenance.

Basic tips:

 Clean Agora® fabrics with neutral soap in lukewarm water. Do not dry-clean water: we recommend to clean at a temperature of no more than 30°.

 Do not dry-clean.

 Iron at low temperature.

 Air dry: do not use a clothes dryer.

 Bleach may be used, in moderation: chlorine bleach will not affect the coloration of the solution-dyed acrylic fiber and it is for this reason acceptable for stubborn stain removal, including mildew. Chlorine bleach, strong chemicals or detergents will eventually affect the strength of any fiber or cloth, so it is better to use a diluted solution of one part bleach to twenty parts water.

Care:

- Do not expose laminated side to UV rays or direct sunlight or any atmospheric agents.
- Washing in washing machine, delicate program, 30°C.
- Do not tumble dry.
- Clean stains with cloth or sponge moistened with a neutral soap solution, always on the fabric side.
- In case of stubborn stains a solution of < 5% bleach may be used instead.
- Do not dry clean nor use perchloroethylene.
- Iron on the fabric side only. Do not iron on the laminated side.
- Do not use pressure washers (Karcher type) on fabric. It may damage the lamination and/or peel it off.

OGO is a brand of 1Tapiza S.L.
