

Care and maintenance

Silvertex fabric

Coated fabrics require periodic cleaning to maintain their appearance and prevent the buildup of dirt and contaminants. Any stain, spill or dirt must be cleaned immediately after production to avoid the possibility of creating a permanent stain. Use a mixture of liquid soap (pH neutral) and water, or approved cleaners for our coated fabrics, to remove stains on the surface of the material. Remove only with a damp white cloth. Lacquers, strong cleaners, detergents, cleaning solutions containing xylene, ketones (MEK) or acetates cause immediate damage and contribute to the deterioration of the material. Use of these cleaners is at the owner's risk.

Dayli cleaning:

Clean the entire surface using a 1:9 mixture of liquid soap and water. Do not use soaps or cleaning solutions that contain alcohol, ketones, xylene, acetates, or solvents (mineral/white spirits). Completely remove excess mixture with a clean, damp white cloth and dry the surface.

After cleaning, always rinse the area with water and dry with a clean, lint-free cloth. If chemical residues are not completely removed, they could cause discoloration of the fabric surface, thus causing this phenomenon to occur earlier in the product's life cycle.

Severe stains:

Step 1: Coffee, juice, red wine, sauces, chocolate, grease, pencil and tanning creams. Remove excess pour with a damp cloth. Clean with a 1:9 mixture of neutral liquid soap and water. Then rinse it with water and dry it.

Step 2: Makeup. Use neutral pH soap directly. Wipe with a clean cloth or soft bristle brush, rinse with water and dry.

Step 3: Blood, urine, feces and other more severe stains. Use a 1:10 mixture of isopropyl alcohol and water. Rinse it thoroughly with clean water and dry it.

Note: To clean, use a soft white cotton cloth soaked with the recommended cleaning agent and rub the stain 10 times in circles. Dry it with another soft white cotton cloth and check the results. Do not use metal bristle brushes or abrasive or metallic fiber sponges, as these can cause permanent damage to the fabric. Methods 2 and 3 are not recommended for daily cleaning.

OGO is a brand of 1Tapiza S.L.
